

COMPUTER NETWORKS AND CYBERSECURITY

Degree Type

Bachelor's Degree

Also Offered Fully Online

Bachelor's Degree

In today's technology-driven economy, experts in computer networks and cybersecurity are needed more than ever to design, administer and manage their network, and protect companies and organizations from hacking and other malicious activity. Demand for cybersecurity experts far outpaces the number of qualified candidates.

Our B.S. in Computer Networks and Cybersecurity provides theoretical, analytical, and practical skills through a solid foundation in computing, networks, and cybersecurity. Students develop the project management, communication, critical-thinking, and technical skills required to be effective in the industry.

DID YOU KNOW?

- + Monroe Computer Networks and Cybersecurity students are encouraged to take part in major-related clubs, including the Information Technology Student Association (ITSA).
- + Information Technology (IT) professionals are found in virtually all sectors, including health, fashion, music, financial, hospitality, nonprofit, and government.
- + Students enrolled in Monroe's Computer Networks and Cybersecurity program are taught by leaders in IT, such as CIOs, network analysts, project managers, system administrators, information security consultants, and network architects.
