The Master of Science in Executive Leadership in Hospitality Management (MSHM) program is an accelerated one-year program that prepares students for leadership positions in several areas of hospitality, including hotels and resorts, convention services, tourism boards and real estate development. The program also attracts those seeking to start their own business or who wish to switch careers from hospitality to academia.

Conducted primarily online, the MSHM program also involves two-week residencies at the beginning and end of the program so that students may build relationships and share information all while experiencing real-world situations to complement their studies. Students will reside in New Rochelle, just a 30-minute train ride from midtown Manhattan, during their two-week residencies.

Course Sequence

Students entering this 36-credit program are expected to complete it in one year. The program is conducted primarily online, but students will be required to attend two two-week residencies at the beginning and end of the program. During these residencies, students will complete 12 credits. An additional 21 credits will be completed online in three semesters beginning in September, January, and April, and an additional 3 credits are earned through the development of a prior learning experience portfolio.
