About the Program

Public health is a diverse field that attracts professionals from various educational backgrounds who work to reduce complex health issues such as sexual transmitted infections, chronic diseases, environmental hazards, and substance abuse; and serve communities locally and globally to improve peoples’ health and prolong lives. Public health professionals need to collaborate with clinicians, health care agencies, and community members to identify resources to help mitigate these health issues and prevent future health problems.

The MPH program is designed for students who are interested in pursuing a career in public health and for those who want to enhance their careers. Most of the professional positions in public health require a graduate degree as this allows individuals to carry out the core functions of public health. Upon graduation, students will be prepared to pursue careers in government agencies, academia, health care institutions, public health interest groups, and non-profit organizations.

The Master’s In Public Health is a 45 credit program. Students are required to choose one of the concentrations in Community Health or Health Administration and Leadership. These concentrations are driven by a curriculum that provides extensive knowledge and skills needed to conduct the essential public health services. The first semesters will involve traditional public health coursework, while the last semesters will be devoted to a practice-based internship, and a thesis paper based on an outcome-oriented project.

**CORE COURSES**— The MPH Program is a 45 credit program consisting of 7 core courses (21 credits), 1 elective course (3 credits), a thesis (6 credits), an internship (3 credits) and 4 concentration courses (12 credits).

- PH 601 — Public Health Systems and Practice
- PH 605 — Behavioral and Social Aspects of Public Health
- PH 640 — Environmental and Occupational Health
- PH 650 — Health Policy and Management
- PH 660 — Principles of Biostatistics
- PH 690 — Global Health
- PH 705 — Principles of Epidemiology

**ELECTIVE COURSES**— Choose one of the courses listed below or any of the concentration courses (3 credits).

- PH 675 — Public Health Informatics
- PH 680 — Emergency Management in Public Health
- PH 715 — Public Health Ethics

**THESIS COURSES**— Must take both courses (6 credits).

- PH 760 — Thesis Proposal
- PH 765 — Thesis data Analysis and Interpretation

**INTERNSHIP** (3 credits)

- PH 780 — Internship in Public Health

**CONCENTRATION COURSES**— Students must choose one of the two concentrations (12 credits).

**HEALTH ADMINISTRATION AND LEADERSHIP**

- PH 625 — Administration and Leadership in Public Health
- PH 670 — Finance and Economics in Public Health
- PH 685 — Public Health Policy and Law
- PH 750 — Research Methods in Health Administration

**COMMUNITY HEALTH**

- PH 620 — Health Promotion and Education in Diverse Communities
- PH 655 — Community Health Program Planning and Development
- PH 710 — Public Health Nutrition
- PH 755 — Research Methods in Community Health
